

LEÉ EL ARTICULO PARA SABER SOBRE: CORONAVIRUS

Nations around the world are preparing for a possible major outbreak of a new deadly virus. The coronavirus, which started in the Chinese city of Wuhan, has already killed 17 people. It has spread to the USA, Japan, Korea and Thailand. More than 540 people have caught the virus and are in hospital. The World Health Organization (WHO) is meeting to decide whether the outbreak is a global health emergency. China is urging people not to panic ahead of the Chinese New Year next week. Millions of Chinese will be travelling across the country to spend the holiday season with their families. Meanwhile, the city of Wuhan has suspended its public transport systems to help stop the spread of the virus.

The new coronavirus is suspected to have come from illegally traded animals in a Wuhan market. The virus mutated and spread from an animal to a human. There are fears it could mutate and spread further. Scientists say the virus is contagious and can be passed from person to person through the air. Dr Linfa Wang, a virologist at the Duke-National University of Singapore, said the new coronavirus is in the same family as SARS, but it's different from SARS. He said people needed to look for pneumonia-like symptoms, such as fever, cough and difficulty breathing.

1. Respondé las siguientes preguntas:

Which country did the virus come from?

What date did the virus start?

Name 2 countries affected by the virus.

How does the virus pass from person to person?

1. UNÍ LA DEFINICIÓN CON LA PALABRA

- | | |
|---------------|-------|
| A. Cough | _____ |
| B. Fever | _____ |
| C. Virus | _____ |
| D. Bacteria | _____ |
| E. Contagious | _____ |
| F. Illegal | _____ |
| G. Cure | _____ |
| H. Pandemic | _____ |
| I. Hospital | _____ |
| J. Sneeze | _____ |

- | |
|---|
| 1. Can be passed on easily by physical contact |
| 2. To release air from the mouth with a sharp sound |
| 3. Forbidden by law and is a criminal act |
| 4. Bacteria that causes infection and makes us sick |
| 5. A disease spread all around the world |
| 6. To release air from the nose |
| 7. Lots of small germs |
| 8. To have a high body temperature |
| 9. A place you go when you are sick |
| 10. To stop or relieve an illness |

Un nuevo
amanecer
siempre nos dará
la opción para un
nuevo inicio

En estos tiempos en los que el llamado a la sociedad es permanecer en sus hogares por la salud de todos, surgen muchas dudas e inquietudes; pero la historia nos enseñó que como individuos y sociedad hemos superado momentos difíciles antes y estos acontecimientos, sin duda, no serán la excepción.

Ante esta medida colectiva, una de las interrogantes más frecuentes es "¿Qué hacemos en casa todo este tiempo?", un poco de adaptación, organización y optimismo, son claves en estos momentos para mantenernos enfocados en aquello que realmente importa y hacer que este tiempo en nuestra casa sea un periodo productivo y beneficioso para nosotros, los nuestros y el entorno.
